.

Introduction

I'm Gadzhi Kharkharov, an interdisciplinary designer with focus on web technologies and interaction.

I'm interested in exploring the possibilities of modern web and creating tools for designers.

Currently working remotely as a Product Designer for Webflow in San Francisco, CA.

Based in Moscow, Russia.

Skills

Product design with focus on web, interaction and systems; prototyping of complex interactions and animations with code; front-end development with focus on CSS layout and architecture; JavaScript (including React.js and component-based architecture).

Projects and Work Experience

Currently: *Product Designer at Webflow (2015–present)*

Webflow Interactions 2.0 (Webflow, 2016)
Designed a system allowing designers to visually create complex web interactions and animations without any coding skills.

Webflow Flexbox (Webflow, 2015)
Designed a visual interface to CSS Flexbox mechanism allowing designers to create expressive, responsive layouts on the web.

Stampsy Web (Stampsy, 2013–2015)
Led product design and supported front-end web development by building a modular CSS architecture with engineers.

Stampsy iPad App (Stampsy, 2012–2013)
Designed and prototyped a lot of touch-based interactions for a simple mobile storytelling design tool.

Freelance (2010–2012)
Worked with various tech startups on different web and mobile app design projects.
